Docker Compose

Recommended system requirements:

- 3 GHz Dual-core Xeon/Opteron (or latest)
- 8 GB RAM
- 10 GB free disk space

(1) Follow these installation instructions to install Docker.

(2) ⬇ **Download** installation archive for docker-compose and extract.

(3) Switch into the relevant resource directory by executing the following commands.

```
cd docker-ei/docker-compose
```

(4) Docker Compose resources for WSO2 Enterprise Integrator provide four deployment options. Switch to the desired WSO2 Enterprise Integrator deployment directory.

For Integrator with Analytics:

```
cd integrator-analytics/scripts
```

For Integrator with Analytics and Business Process:

```
cd integrator-bps-analytics/scripts
```

For Integrator with Analytics and Broker:

```
cd integrator-broker-analytics/scripts
```

For Integrator with Analytics, Broker and Business Process:

Other Options

AWS

Zip Archive

Source

Kubernetes

Docker

Helm

Windows X64

Mac OS

Ubuntu

Puppet

Ansible

Hi! Companies like yours are already using API Manager! Ready to get started?

```
    cd integrator-broker-bps-analytics/scripts
```

(5) Execute the following Docker command to start the selected deployment.

```
    ./deploy.sh
```

(6) Once the deployment is started, access the management consoles of each profile via the following URLs on your favorite web browser using the credentials **username: admin** and **password: admin**.

To access Integrator and Analytics respectively:

```
    Integrator: https://localhost:9443/carbon
  Analytics Dashboard: https://localhost:9643/portal
```

To access Integrator, Analytics and Broker respectively:

```
    Integrator: https://localhost:9443/carbon
  Analytics Dashboard: https://localhost:9643/portal
  Message Broker: https://localhost:9446/carbon
```

To access Integrator and Business Process Server with Analytics respectively:

```
    Integrator: https://localhost:9443/carbon
  Business Process: https://localhost:9445/carbon Analytics
  Dashboard: https://localhost:9643/portal
```

To access Integrator, Analytics, Business Process, and Broker respectively:

```
    Integrator: https://localhost:9443/carbon
  Analytics Dashboard: https://localhost:9643/portal
  Business Process: https://localhost:9445/carbon
  Message Broker: https://localhost:9446/carbon
```

Please note that the Message Mediation Gateway will be available on the following ports.

```
    https://localhost:8243
  https://localhost:8280
```

To start using WSO2 Enterprise Integrator, read the Quick Start Guide.
